RELEVANT EXPERIENCE

General Assembly Web Development Immersive

March 2017 – June 2017

Jot – HTML, CSS, JavaScript, Angular JS, Ruby on Rails, PostgreSQL, Node.js, Express.js.
Jot is a simple and minimalistic note taking app that allows you to quickly jot down your thoughts. I built the front-end using Angular JS to make AJAX requests to the backend API that I built using Ruby on Rails and a PostgreSQL database.

The Perfect Excuse – HTML, CSS, JavaScript, Angular JS, Ruby on Rails, PostgreSQL, Node.js, Express.js.
Perfect Excuse is a web application for finding the perfect excuse. Users can create an account and add their own excuse or vote for the most popular one. Built with a group and uses Angular JS and Express front-end, and a Ruby on Rails with PostgreSQL backend.

Claim Your Throne – HTML, CSS, JavaScript, Angular JS, MongoDB, Mongoose, Node.js, Express.js.
Claim your Throne is a MEAN stack, single-page CRUD app. It allows users to search for their favorite Game of throne characters and create/add them to their own "Houses". This app was built with a group utilizing Angular JS for the front-end, and MongoDB for the back-end.

Chefs Corner – HTML, CSS, JavaScript, MongoDB, Mongoose, Node.js, Express.js.
Chefs corner is a full-stack, sessions-based, four model CRUD app built with MVC framework. It's an application that lets users create and share food posts.
